

Index_Lambda

IS

il_

ol_
pl_

Conn

The diagram illustrates a network structure. At the bottom is a gray rectangular box labeled 'Conn'. Two dashed purple lines originate from the top of 'Conn': one goes up and to the left to a white rectangular box labeled 'Index_Lambda', and the other goes up and to the right to a white rectangular box labeled 'IS'. The line to 'Index_Lambda' is labeled 'il_' in the middle, and the line to 'IS' is labeled 'ol_' and 'pl_' stacked vertically in the middle. Both target boxes have solid purple arrows pointing towards them from the dashed lines.
